CHARAN SHYAM PRASAD

Bangalore, India · Open to relocation — Kuala Lumpur, Malaysia · +91 9008001592 · charan.s.prasad@gmail.com · linkedin.com/in/charan-sprasad · AI Creative Portfolio

PROFILE

AI Creative Systems Builder with hands-on experience designing production-grade AI generation pipelines, ComfyUI workflows, and internal automation tools that non-technical teams actually use. Built an AI Ad Creative generation workflow — using Python and Nano Banana — currently live in ShopOS Pro, and independently architected a full-stack AI content pipeline for a live e-commerce client. Proficient across the full AI creative stack — ComfyUI workflow design, LoRA training, ControlNet/IC-Light/IP-Adapter, Python pipeline engineering, and API-connected backends with deployable interfaces. Hands-on with Nano Banana, Kling, Veo3, Wan2.2, FLUX, AnimateDiff, and Stable Diffusion. Grounded in performance marketing from prior roles — understands what makes an ad work, not just what makes it look good.

TECHNICAL SKILLS

ComfyUI & Open-Source Models: Workflow design, ControlNet (Canny), IC-Light, IP-Adapter, GroundingDINO + SAM, LoRA training, inpainting, FLUX, Stable Diffusion, AnimateDiff, custom node integration

AI APIs & Pipeline Integration: Gemini API (multi-model pipeline with fallbacks), Shopify GraphQL, Zyte (bot-bypass scraping), Zerodha Kite Connect

Frontend & Internal Tools: Next.js, TypeScript, React, Tailwind CSS, Radix UI, Framer Motion; full-stack internal tool development

AI Image & Video Tools: Nano Banana Pro / Nano Banana 2, Kling, Veo3, Wan2.2, Sora 2; prompt engineering, lighting control, model selection & evaluation

Backend & Automation: Python, FastAPI, Flask, n8n, RAG systems, SQLite, Docker / Docker Compose, task queue architecture

Deployment & Infra: VPS (Hostinger), Ubuntu server management, Docker Compose, Git / version control, AI coding agents (Claude Code)

PROFESSIONAL EXPERIENCE

Zebotech *(Freelance Client Project)* — Feb 2026 – Mar 2026

AI Systems Engineer · Remote

- **Solo-built and deployed** an end-to-end AI product content pipeline for a live e-commerce electronics client — actively used in production, saving significant manual hours on product listing creation weekly.
- **Architected a 3-stage AI generation pipeline:** Stage 1 — web scraping via Zyte API + Playwright to extract and normalize competitor product data. Stage 2 — structured Gemini AI pipeline (versioned JSON prompts, model fallbacks) to generate product descriptions. Stage 3 — generative AI image production followed by direct publishing to Shopify via GraphQL API.
- **Built the complete internal tooling stack** for non-technical operators: FastAPI backend with an SQLite-backed async task queue, Docker Compose deployment on a VPS, and a Next.js / TypeScript frontend UI — the client's team runs the full pipeline without any engineering support.
- Implemented production-grade resilience: exponential backoff, per-task concurrency controls, cascading failure detection, and state persistence across server restarts.

ShopOS — Jun 2025 – Sep 2025

AI Workflow Engineer · Bangalore, India

- **Built the AI Marketing Ad Gen workflow** now live in ShopOS Pro — built with Python and Nano Banana; brands provide minimal product inputs and receive production-ready ad creatives, eliminating design dependency for campaign launches.
- **Designed 5 distinct ComfyUI workflows** for product image stylization as part of the technical hiring assessment: ControlNet/Canny (shape & edge preservation), IC-Light (photorealistic depth and lighting), IP-Adapter (guided stylization with identity retention), GroundingDINO + SAM (precise product segmentation), and a combined high-fidelity pipeline integrating all of the above.
- **Trained custom LoRAs and inpainting models** to maintain consistent product visual identity across stylization passes, enabling brand-accurate AI image generation at scale.
- **Built a RAG information retrieval system** for the CRM team, giving reps instant access to structured client data and improving response speed and accuracy by 40%.
- **Automated repetitive CRM workflows** using n8n and Python, eliminating 25–40 hours/month of manual effort and freeing the team for higher-value work.
- Developed AI-driven product listing generators for Amazon & Flipkart, improving listing quality and marketplace performance.

Delta Infotek
Jan 2024 – Dec 2024

Business Development & Marketing Associate · Bangalore, India (Remote)

- Automated lead generation and outreach workflows using Apollo, SignalHire, Lusha, and ZoomInfo, reducing manual workload by 30% and driving a 15% increase in lead conversions.
- Set up email infrastructure (DKIM, DMARC, SPF) across five domains, improving deliverability by 30%; executed account-based prospecting campaigns across LinkedIn and email.

SignalX
Jun 2023 – Nov 2023

Sales Development Representative (Intern) · Hyderabad, India

- Managed 1,500–2,000 outbound emails/month with A/B tested sequences, generating 20–30 qualified leads monthly; closed a ₹17+ lakh deal with Ashok Leyland end-to-end.

Kapture CX
Feb 2023 – Jun 2023

Lead Generation & Pre-Sales Specialist (Intern) · Bangalore, India

- Cold call and email outreach securing senior decision-maker meetings; managed lead qualification and onboarding communication.

PERSONAL PROJECTS

Algorithmic Options Trading System
Nov 2025 – Present

Python / Flask / Zerodha Kite Connect API

- Built a fully automated options trading system (7,000+ lines) for Indian markets (NSE/NFO/MCX) — support/resistance level monitoring, atomic entry + stop-loss placement, trailing SL state machine, and dual-account mirror trading via parallel threads.
- Flask web UI for instrument configuration and live monitoring; persistent state across restarts.

Multiple LoRA Training & AI Digital Clone
Apr 2025

Stable Diffusion / LoRA Fine-tuning

- Trained multiple custom LoRA models to create a consistent AI-generated digital likeness — applied across editorial, fashion, and lifestyle creative contexts.

EDUCATION

Jain University Bangalore, India

Bachelor of Business Administration (BBA) · Graduated with Distinction
